Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: The Applicant Representative discussed several proposed amendments to Claim 1, emphasizing that the client window (with advertisements) was running concurrently with, but independently from, the browser window. After further discussion, Applicant Representative indicated that a possible additional feature that the client window is continuously displaying advertisements may help clarify the invention and overcome the cited prior art. The Examiner agreed that this was a new feature which had not been searched and that while the cited prior art did not seem to indicate that the advertisements are continuously displayed, a more careful reading of the prior art and another search would be needed to determine if this feature can be found.
